In September 2024, four Seattle-area churchgoers found each other at a similar festival hosted by First Church of Christ, Scientist, Boise. Moved and inspired, we brought the idea back with us. We're deeply grateful for God's unfoldment for showing these films in our area.

Contributions may be sent to: Treasurer, First Church of Christ, Scientist, Bellevue.

The Effulgence Foundation
CHRISTIAN SCIENCE FILM FESTIVAL
SEATTLE AREA | MAY 10 2025

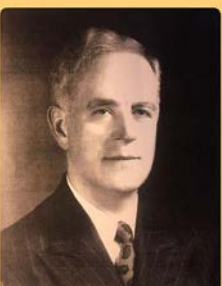

The DR. JOHN TUTT STORY – Dr. Tutt was a brilliant man with a promising career in medicine. He was only 19 when he became a doctor at the end of the 19th century. But his dissatisfaction with the unpredictability of medical practice, coupled with his own healing experience in Christian Science, turned him wholeheartedly to the practice of this Science and its unerring divine Principle – which, he said, answered all theological and medical questions for him. Subsequently, he became one of the most well-known lecturers and teachers of Christian Science in the 20th century. The film covers the spiritual journey of this dedicated, resolute Christian Scientist through many challenges, trials, and victories.

The HELEN WOOD BAUMAN STORY – Christian Science was the answer to Helen Wood Bauman's deep desire to help humanity, and her understanding of the teachings of Mary Baker Eddy bore fruit in an extensive healing practice. She went on to become a teacher of Christian Science, and her love for communicating its healing rules and laws, coupled with her love of writing, enabled her to have over 1,000 articles published in the Christian Science periodicals. Our film gives viewers an inside look at an individual who would become the longest serving editor of the Christian Science periodicals.

The L. IVIMY GWALTER STORY – This is a film about one of the most dynamic workers in the Christian Science movement. Ivimy Gwalter grew up in New York at a demanding time for our country and the world – a world torn apart by World War I. Our film shows how Miss Gwalter's demonstration of the Science discovered by Mary Baker Eddy would contribute to the healing of the country, the reviving of its economy, and bring health to sufferers during the time of a major pandemic. She was both a practitioner and teacher of Christian Science, contributed many articles for the Sentinel and Journal, and became one of the longest serving members of the Christian Science Board of Directors.

The PAUL STARK SEELEY STORY – Paul Stark Seeley was one of the most beloved and respected lecturers in the history of the Christian Science movement. Graduating with a law degree from Harvard University, he left his law practice to practice Christian Science, the law of God, becoming a practitioner, teacher, and lecturer. Mr. Seeley's lectures fed a spiritually hungry world with the truths of Christian Science, as revealed to and taught by Mary Baker Eddy. The film documents not only his accomplishments, but also the challenges he would face and overcome.
